PRODUCT ADVANTAGES

- Made of pure and natural, edible for human raw materials.

· Content of protein is over 80%, without any additives, excellent palatability.

· Easy to digest and absorb.

· Sterilization through irradiation offers guarantee for pets' health.

· Freeze-drying technology ensures long shelf life, no preservatives are needed.

FREEZE-DRYING PROCESS

Fresh and natural meat is chosen and cut into pieces without applying any other ingredients, while the fat, skin and bones are removed. No artificial compositions inside. Then freeze those pre-processed material at -32°C to lock its nutrition and waiting for process.

Vacuum freeze-drying for 18 to 36 hours to sublimate its water; raising temperature to 90°C for sterilization, completing the entire freeze-drying process to retain its nutrition.

Carefully select qualified products with color screen system and metal detector (Security warning will be alarmed when any metal length exceeds 0.1mm)

For qualified products will be sent to full-automatic packaging line, which can meet all package demands from our customers.

After irradiation, products will be stored in large warehouse waiting for shipment.
